

# Amirali Daliri

## Full-Stack Software Engineer | Backend & AI

Tehran, Iran | [amirali@allmaker.dev](mailto:amirali@allmaker.dev) | [allmaker.dev](https://allmaker.dev)  
[linkedin.com/in/amirali-daliri](https://linkedin.com/in/amirali-daliri) | [github.com/ThunderRonin](https://github.com/ThunderRonin) | [Telegram](#)

### PROFILE

---

Full-stack software engineer with **5+ years of experience** across freelance and in-house roles, specializing in backend engineering and AI systems. Builds .NET commerce services, Go real-time communications, and AI applications with RAG, vector search, and LLM routing. Sole technical lead at Kasb, owning backend, web, mobile, and infrastructure delivery.

### PROFESSIONAL EXPERIENCE

---

#### Kasb Platform

2025 - Present

Lead Full-Stack & Systems Infrastructure Engineer

Tehran, Iran

- Owned backend, web, mobile, and DevOps delivery as the sole technical lead, using specialized AI agents to support implementation across the platform.
- Developed financial ledger and B2B commerce services in ASP.NET Core and Entity Framework Core; resolved double-entry reconciliation discrepancies and enforced transactional invariants.
- Led the migration from Windows/IIS to Linux containers with Docker Swarm, isolated overlay networks, and self-hosted CI runners.
- Optimized constrained production infrastructure with container resource limits, memory-efficient services, and caching without increasing the infrastructure budget.
- Built financial document rendering in Linux containers using Syncfusion Blink, supporting Persian typography and right-to-left invoices.
- Prepared the SQL Server-to-PostgreSQL migration through EF Core multi-provider abstractions and migration validation test suites.

#### PetaProc

Sep 2024 - Apr 2026

Full-Stack Engineer | Real-Time Systems & AI

Tehran | London

- Built a Go voice/video backend with Pion WebRTC media relays and WebSocket signaling; used Socket.IO and Redis pub/sub to support horizontal scaling.
- Implemented AI vector search with LanceDB and Qdrant.
- Instrumented services with OpenTelemetry distributed tracing and Sentry error monitoring to diagnose production incidents.
- Integrated asynchronous media processing with Asynq, Redis job queues, and MinIO object storage.
- Maintained NestJS and Go/Gin REST APIs; replaced PostgreSQL full-text search with Elasticsearch.
- Delivered Flutter clients for iOS, Android, and desktop with Riverpod, call UI, threaded replies, file uploads, and widget tests.

PROFESSIONAL EXPERIENCE (CONTINUED)

**Dorj Wallet**  
Back-End Developer

Apr 2024 - Aug 2024  
Tehran, Iran

- Built NestJS APIs for a cryptocurrency platform, using Ethers.js for wallet connectivity, transaction signing, and smart-contract interactions.
- Integrated the Ledger SDK to enable hardware-based transaction signing for end users.

**Independent Software Engineer**  
Freelance

Apr 2021 - Present  
Remote

- Delivered freelance engagements and technical bounties addressing production bottlenecks, protocol security, and custom automation across diverse codebases.
- Built full-stack systems and microservices for international clients, with a focus on reliability and low operational overhead.

SELECTED PROJECTS

**AllCodex Ecosystem & AllKnower**

[GitHub](#)

- Built an AI orchestration service in Bun/Elysia with retrieval-augmented generation (RAG), LanceDB vector search, and local embeddings.
- Integrated multi-model LLM routing through OpenRouter and MCP server connectivity; built the AllCodex portal with Next.js and SvelteKit.

**AllTracker | Cross-Platform Telemetry Tracker**

[GitHub](#)

- Released a Flutter habit and telemetry tracker for desktop and mobile with Riverpod, system tray integration, and offline-first SQLite storage.

**AryaMehr Calendar | Zepp OS Smartwatch Engine**

[GitHub](#)

- Developed a Persian and Zoroastrian astronomical calendar for Amazfit GTR 4, including traditional Gahs and solar prayer-time computation.

TECHNICAL SKILLS

**Languages:** TypeScript, C#, Go, Dart, JavaScript, Python, SQL, Shell  
**Backend:** ASP.NET Core, EF Core, Node.js, NestJS, Bun/Elysia, Go/Gin  
**AI systems:** Agent orchestration, RAG, MCP, LanceDB, Qdrant, OpenRouter  
**Data & storage:** PostgreSQL, SQL Server, Redis, Elasticsearch, Prisma, SQLite, MinIO, S3  
**Infrastructure:** Docker Swarm, Linux, NGINX, CI/CD, Cloudflare Workers, Async  
**Observability & testing:** OpenTelemetry, Sentry, Serilog, Grafana Loki, Jest, Vitest, Playwright  
**Web & mobile:** React, Next.js, SvelteKit, React Native, Flutter, Riverpod

EDUCATION

**Bachelor's in Computer Engineering (in progress)**

2023 - Present

Iran University of Industries, Tehran

**Allameh Helli High School | NODET**

2020 - 2023

Diploma in Mathematics & Physics | Tehran, Iran  
National Organization for Development of Exceptional Talents
